

# Veberod Gem Gallery Class Notes

## Jewelry Basics - Sawing

In this basics class, we'll talk about posture, grip and seat height when you're cutting metal. You'll get lots of notes, including information about picking the right saw blade for the job. Pick up or bring some sheet metal with you and we'll cut out basic shapes for earrings or another project for you to take through the other 2 basics classes! (B)

Prerequisites: None

### Supplies Required:

20ga Copper or Sterling Silver Sheet: 486060, 480120

Approx Supplies Cost: \$15 and up

### A note on cost of supplies -

We prefer not to offer kits for our classes. We try to encourage students to pick equipment and supplies (stones, beads etc.) based on their individual creativity. Often there are several options available and you may have some items already. If this is your first class, you are welcome to use the shop's tools so you can discover how enjoyable it can be! New students will need to share the shop tools between them. **It is important to remember to always bring your tools from home!** Also, please mark them so that they are identifiable as your own. If you have any questions regarding the cost of tools, supplies or anything else about the class, please contact us.
